## W.FL2 Series

### ■ Features

- 1. Nominal mated height of 1.18 mm (Max. 1.3 mm)**
- 2. Small board footprint**  
 As with W.FL Series, the receptacles occupies an area of 3.4 mm<sup>2</sup> and share the same land pattern.  
 Note: The W.FL2 Series and the W.FL Series are not compatible.
- 3. Extremely light weight**  
 Receptacle weight of 5.0 mg and plug weight of 17.4 mg makes the connectors one of the lowest weights on the market
- 4. Accepts high frequency transmission of DC to 6 GHz**  
 DC to 3 GHz: V.S.W.R. of 1.3 max.  
 3 GHz to 6 GHz: V.S.W.R. of 1.4 max.
- 5. Automatic board placement**  
 Packaged on tape-and-reel the receptacles can be placed with vacuum nozzles of the automatic placement equipment.
- 6. Plugs are terminated with ultra-fine coaxial (fluorinated resin insulated) cable**  
 Standard ultra-fine coaxial cable of 0.81 mm diameter (single braid shielding) is used for the plug termination, assuring secure and stable connections.
- 7. Simple connector mating / un-mating**  
 Use of the available mating / un-mating tools assures correct connection / disconnection of the plug and receptacle.

**■Precautions**

**1. Plugs**

<p>(1) Mating / unmating</p>	<p>① To disconnect connectors, insert the extraction side of insertion and extraction jig W.FL2-LP-IN.OUT and perform as described in the diagram below.</p> <p><b>• Unmating</b></p>  <p><b>• Mating</b></p> <ol style="list-style-type: none"> <li>Align the mating tool W.FL-LP-IN or the mating end of the tool W.FL2-LP-IN.OUT over the plug end of the cable assembly.</li> <li>Firmly place the tool over the plug until it is secured in the tool.</li> <li>Place the plug cable assembly (held in the tool) over the corresponding receptacle.</li> <li>Assuring that the plug and receptacle are aligned press-down perpendicular to the mounting surface until both connectors are fully mated.</li> <li>Remove the mating tool by carefully pulling it up. Removal of the tool</li> </ol>  <p><b>● Use of the extraction tool is absolutely mandatory. Any attempt of unmating by pulling on the cable may result in damage and affect the mechanical / electrical performance.</b></p>
<p>(2) Pull forces on the cable after connectors are mated</p>	<p><b>• Plug</b></p>  <p>Do NOT apply any pull forces after the bending of the cable.</p>
<p>(3) Precautions</p>	<p>Do not twist connectors excessively during mating / unmating.</p>

**2. Receptacles**

<p>(1) Recommended reflow temperature profile</p>	 <ol style="list-style-type: none"> <li>The temperature of the printed circuit board surface temperature at the points of contact with the terminals.</li> <li>Reflow soldering should be performed at a printed circuit surface temperature of 250°C max.</li> <li>In individual applications the actual temperature may vary, depending on the solder paste type, volume / thickness and board size / thickness. Consult your solder paste and equipment manufacturer for specific recommendations.</li> </ol>
<p>(2) Recommended metal mask thickness</p>	<p>0.1 mm to 0.12 mm</p>
<p>(3) Reflow cycles</p>	<p>2 times</p>

**3. Operating environment and storage conditions**

<p>(1) Operating environment</p>	<p>The connectors are NOT designed to operate in the following environments:</p> <ul style="list-style-type: none"> <li>Exposed to a excessive amounts of fine particles and dust</li> <li>Regions and places having a high density of sulfur dioxide, hydrogen sulfide, nitrogen dioxide or other corrosive gasses.</li> <li>Environments having large rapid variations in temperature.</li> </ul>
<p>(2) Storage conditions - Receptacle</p>	<p>Store in the Hirose Electric packaging.          Temperature: -10 to +40°C, Humidity: 85% max.          Use within 6 months of delivery.          Receptacles for which the storage period has elapsed must be tested for solderability to the PC board mounting surface.</p>
